

Sources:

- **10 Most Convenient European Airports Infographic:** Infographic data is based on the top 10 most popular airports amongst UK flight passengers which has been derived from GoEuro's Internal database.
- **Overall Ranking of Europe's Most Convenient Airports:** The airports included in the ranking stem from the following countries: Spain, UK, Germany, Portugal, Sweden, Italy, Ireland, France, Luxembourg, Netherlands, Belgium, Poland and the Czech Republic. The airports were chosen on the basis of volume of passenger traffic in Europe using [Eurostat data](#) from 2016.
- **All Displayed Information:** All the information about the airports have been taken from the official public transport and airport websites.
- **Currency:** All prices of transportation were converted on the 11.07.2017 using the currency rate on bloomberg.com. Small discrepancies may occur.

The criteria used to assess and classify the airports of each country are as follows:

- **Distance:** Showing the distance in miles between the airport and the city centre.
- **Fastest transportation mode¹:** Fastest mode of transportation to get from the airport to the city centre for trains, buses, trams and underground trains.
- **Duration¹:** The time it takes in minutes to get from the airport to the city centre.
- **Price¹:** The cost of an individual ticket for the chosen mode of transport.
- **Cheapest transportation²:** The transportation with the lowest cost to get from the airport to the city centre.
- **Duration²:** The time it takes to get from the airport to the city centre in relation to the cheapest means of transportation.
- **Price²:** The cost of a single ticket for the cheapest transportation.
- **Extra information:** Some subjects were not displayed but were taken into account such as Cheapest transportation², Duration² and Price² for the Overall Ranking of Europe's Most Convenient Airports.

Scoring:

- The total score is a combination of all the above criteria. The better the transportation possibilities from the airport to the city centre, the higher the score.

- Criteria such as distance, fastest transportation mode and cheapest transportation mode were awarded double points when calculating the overall score.
- Scores are given in the bare form of their value.
